What does the title Born on the Water mean? Do you think it is an appropriate title for this book? Why or why not?

The title Born on the Water refers to the end of the story when they all made a new community while on water and to them they thought they were born on water. For example, some of them didn't know each other but they had to stick together so they made a new community. I think this is an appropriate title because it helps me understand why they said this when they changed communities. For example, when they were enslaved they were moved from their families and had to bond together with strangers.
