Peering into the Black Box - Questions

Directions: After reading through the article with your partner, complete each of the following questions. Be sure to use evidence from the article in your answer.

In the article, what were the students doing?	Students would post stuff protesting on social media
What rights were they exercising?	First Amendment right Freedom of speech and assembly
How was AI being used in these situations?	AI was used to track student information when they use it.
In previous lessons, we looked at First Amendment rights to free speech and a free press. Has this article challenged or changed the way you think about free speech and/or a free press?	Yes. It's challenged because people who communicate through AI are getting their information out in the world.
Could this impact our democracy (remember: democracy is based on citizen participation)?	Yes it could because AI could put stuff out in the world that no one would be able to tell if it's true or not.
Can you imagine how AI might be used in other ways that can challenge our rights?	AI can be used to frame someone of something they did not do.
Were the events in this article a surprise to you? (Have you heard about stories like these before?) Why or why not?	Yes it did surprise me because I didn't know AI could be used badly. Yes I have heard stories like this.

Peering into the Black Box - Questions

Directions: After reading through the article with your partner, complete each of the following questions. Be sure to use evidence from the article in your answer.

In the article, what were the students doing?	Students were planning on protesting
What rights were they exercising?	The First Amendment to protest + free speech
How was AI being used in these situations?	It was tracking what students were doing online and other personal information
In previous lessons, we looked at First Amendment rights to free speech and a free press. Has this article challenged or changed the way you think about free speech and/or a free press?	Yes, I now feel like it isn't being protected enough and not being taken seriously
Could this impact our democracy (remember: democracy is based on citizen participation)?	Yes, AI could put in fake/false input
Can you imagine how AI might be used in other ways that can challenge our rights?	Yes, it could spread false information and act as a fake "person"
Were the events in this article a surprise to you? (Have you heard about stories like these before?) Why or why not?	Yes they were surprising because I have never heard of anything like this before and it makes me

worry for AI in the future.

Peering into the Black Box - Questions

Directions: After reading through the article with your partner, complete each of the following questions. Be sure to use evidence from the article in your answer.

 In the article, what were the students doing?	Students were posting on social media + protesting
  What rights were they exercising?	Their first amendment rights of free speech + assembly
 How was AI being used in these situations?	AI was tracking online interactions between students
In previous lessons, we looked at First Amendment rights to free speech and a free press. Has this article challenged or changed the way you think about free speech and/or a free press?	Yes, it's challenged the way I think about freedom of speech. Public posts, though public, aren't permission to feed words into AI.
Could this impact our democracy (remember: democracy is based on citizen participation)?	Yes. If we allow robots to track + predict our data, it would cause a huge breach of privacy.
Can you imagine how AI might be used in other ways that can challenge our rights?	AI could be used to frame people for crimes, sell information, and spread false information.
Were the events in this article a surprise to you? (Have you heard about stories like these before?) Why or why not?	I was surprised that the AI accessed private messages. I've heard things like this before, and it scares me.
